

*simply customisable*

## DAS 012

A Product of C&M ELECTRONIC ENGINEERING SERVICES

The DAS 012 is an customisable message announcer system for multiple applications.

There is a specially installed microphone jack that allows you to make manual announcements, it also enables you to perform up to 5 re-recordable digital messages in WAV format.

The DAS 012 is designed to be especially user-

friendly for all operating staff to playback, yet easy to be programmable for any desired sound message using DAS Series Programmer on-site.

Whatever your announcement needs are

***simply...***

***customisable.***
